ECLISSE

pocket door hardware systems

Two adjustable door stops

Sliding Carriages with ball bearings

- The unique trimless design of Eclisse combines visual appeal, strength and versatility for a commercial environment.
- The full height detail is designed to allow the under side of the track to finish with the ceiling, providing a smooth continuous flow from room to room.
- Offers a totally square set finish around the perimeter of the frame giving a seamless transition through living areas.
- Designed to provide the absolute minimum of detail giving the ability to completely conceal the door and give the impression that the door does not exist when open, and complete privacy when closed, adding a contemporary and architectural dimension to any project.

Pocket Systems Add extra space
